According to the Report, for the assassination to have been the work of one man, one bullet had to have accounted for all the non-fatal injuries to the President and the Governor. This is the single-bullet theory. It is one of the foundations of the Report. Without it there is, without question, a conspiracy. In a public forum, the Theater For Ideas on September 30, 1966, Liebeler said, "The fact that the Report says all the evidence supports the one-bullet theory is simply not correct. The Report is wrong in that respect and there is simply no doubt about it."
